NPC

OVERVIEW

The SM5002L series crystal oscillator module ICs fabricated in NPC's Molybdenum-gate CMOS. They comprise low-voltage low-current consumption oscillator circuits and output buffers. They incorporate built-in oscillation capacitance with superior frequency response to realize stable 3rd overtone oscillation without any external components.

FEATURES

- Oscillation frequency up to 100MHz
- 3rd overtone oscillation
- 2.7 to 3.6V supply voltage
- Capacitors C_G and C_D built-in
- Inverter amplifier feedback resistance built-in
- CMOS input level
- Output three-state function
- Standby function (oscillator stops)

SERIES CONFIGURATION

• $3\mu A$ (typ) low standby current

- 8mA (V_{DD} = 3.0V) output drive capability
- Oscillator frequency output
- CMOS output duty level
- INHN pin pull-up resistance built-in
 - INHN = L: $2M\Omega$ typ
- INHN = H: $90k\Omega$ typ
- 8-pin SOP (SM5002L×S)
- Chip form (CF5002L×)

	Recommended		0	Outruit	Output	Chandhu			
Version	operating frequency range ¹ [MHz]	gm ratio	C _G [pF]	C _D [pF]	R _{f1} [kΩ]	C _f [pF]	Output duty level	current [mA]	Standby function
CF5002LA SM5002LAS	30 to 40	1.0	8	15	5.6	22	CMOS	8	Yes
CF5002LB SM5002LBS	40 to 60	1.5	8	15	4.7	22	CMOS	8	Yes
CF5002LC SM5002LCS	50 to 70	1.5	8	10	3.9	22	CMOS	8	Yes
CF5002LD SM5002LDS	70 to 90	2.0	8	10	3.9	22	CMOS	8	Yes
CF5002LE SM5002LES	85 to 100	2.0	8	10	2.7	22	CMOS	8	Yes
CF5002LF SM5002LFS	25 to 30	1.0	10	15	8.5	22	CMOS	8	Yes

 The recommended operating frequency is a yardstick value derived from the crystal used for NPC characteristics authentication. However, the oscillator frequency band is not guaranteed. Specifically, the characteristics can vary greatly due to crystal characteristics and mounting conditions, so the oscillation characteristics of components must be carefully evaluated.

 $V_{SS} = 0V$, Ta = -20 to 80°C unless otherwise noted.

1. The duty cycle characteristic is checked the sample chips of each production lot.

2. Oscillator stop function is built-in. When INHN goes LOW, normal output stops. When INHN goes HIGH, normal output is not resumed until after the oscillator start-up time has elapsed.

Current consumption and Output waveform with NPC's standard crystal

FUNCTIONAL DESCRIPTION

Standby Function

The oscillator stops when INHN goes LOW. When the oscillator stops, the oscillator output on Q goes high impedance.

INHN	Q	Oscillator
HIGH (or open)	f _O output frequency	Normal operation
LOW	High impedance	Stopped

Output Enable/Disable Delay

The following figure shows the oscillator timing during normal operation. Note that when the device is in standby, the oscillator stops. When standby is released, the oscillator starts and stable oscillator output occurs after a short delay.

INHN inputwaveform $tr = tf \le 10ns$

Please pay your attention to the following points at time of using the products shown in this document.

The products shown in this document (hereinafter "Products") are not intended to be used for the apparatus that exerts harmful influence on human lives due to the defects, failure or malfunction of the Products. Customers are requested to obtain prior written agreement for such use from SEIKO NPC CORPORATION (hereinafter "NPC"). Customers shall be solely responsible for, and indemnify and hold NPC free and harmless from, any and all claims, damages, losses, expenses or lawsuits, due to such use without such agreement. NPC reserves the right to change the specifications of the Products in order to improve the characteristic or reliability thereof. NPC makes no claim or warranty that the contents described in this document dose not infringe any intellectual property right or other similar right owned by third parties. Therefore, NPC shall not be responsible for such problems, even if the use is in accordance with the descriptions provided in this document. Any descriptions including applications, circuits, and the parameters of the Products in this document are for reference to use the Products, and shall not be guaranteed free from defect, inapplicability to the design for the mass-production products without further testing or modification. Customers are requested not to export or re-export, directly or indirectly, the Products to any country or any entity not in compliance with or in violation of the national export administration laws, treaties, orders and regulations. Customers are requested appropriately take steps to obtain required permissions or approvals from appropriate government agencies.
